MEMORANDUM #03-65

TO: Administrators, Exceptional Student Education

FROM: Michele Polland

SUBJECT: Assistive Technology Awareness Day

We are pleased to recognize February 5, 2004, as Assistive Technology Awareness Day. This day is dedicated to recognizing the impact of assistive technology on the educational success of students and the support of teachers, related personnel, and families in achieving this success.

Please help support Assistive Technology Awareness Day in your district. Across the state, technology specialists are planning for presentations to school boards, faculty, and parent organizations. Assistive technology will be featured on school district and local television stations and in school technology labs. Posters to be displayed in your schools have been sent to your local Florida Diagnostic and Learning Resources System (FDLRS) Center. Contact your local Center for posters and more information.

Thank you for recognizing this statewide day highlighting assistive technology.
