**Listing of Data Indicators for Continuous Improvement
and Bureau Staff Contacts
2001-2002**

As part of the continuous improvement/self assessment monitoring process, districts reviewed their individual LEA profiles and chose key data indicators to target for further study and intervention. Districts were required to address at least two indicators; one for students with disabilities and one for students identified as gifted. As a part of each district's data analysis, resources such as surveys, interview protocols, or rating scales may be developed that might be of interest to other districts.

The following list of districts by indicator is provided in an effort to assist districts interested in collaborating with others that are addressing the same or similar indicators. In addition, contact persons at the Bureau are identified for each indicator. These individuals are available to provide technical assistance regarding the development of continuous improvement monitoring plan.
